Karawang, Jawa Barat

Informatics Engineering graduate with an interest in software development, especially frontend development. Having valuable experience through independent study at Ruangguru as Frontend Engineering for 6 months, where I honed my skills in user interface development and web design. Besides frontend, I am also actively learning and developing skills in relevant fields such as Backend Development, Web Design, UX/UI Design. I also have a strong interest in Data Analytics and Data Entry. I am interested in analyzing data to find useful insights, make data-driven decisions, and support business strategies. My ability to process and enter data accurately also helps ensure high data quality. Currently, I am looking for better opportunities to build a professional career in both Software Development, Data Analyst and Data Entry.

Experiences

RevoU - **Online**   Jul 2024

Mini Course Software Engineering

- Create a simple website using HTML, CSS, and JavaScript for interactive temperature conversion (Celsius to Fahrenheit and vice versa), including input validation and error handling to ensure accurate conversion results.

PT. Ruang Raya Indonesia (Ruangguru) - **Online**   Feb 2023 - Jul 2023
